

Community Grant Programme for 2026/2027

Grant Training and Support Offer

At RM Partners NHS Cancer Alliance, we're committed to making sure you feel confident, equipped, and fully supported throughout your grant journey. As part of the programme, you'll gain access to a comprehensive package of expert-led training and development opportunities designed to strengthen your impact and enhance your delivery.

What's included:

Grant Programme Induction

Kick-start your journey with an online induction session, introducing you to the wider campaign programme, the work of the NHS Cancer Alliance, and the vital role of our VCSE partners.

Clinically Led Webinars (x3)

Ahead of each campaign, join interactive webinars led by local GPs. These sessions provide essential clinical insight into each focus area, offer the chance to preview campaign materials before launch, and include a live Q&A to support your understanding.

Psychosocial Training

Delivered by qualified psychologists, these online sessions will equip you with practical skills in motivational interviewing and supporting individuals with a cancer diagnosis. You'll also gain valuable tools to help sustain long-term behaviour change within your communities.

Systemic Bias Training

Developed and delivered by the Health Innovation Network and bRap (an equality-focused charity), this immersive, full-day, face-to-face training will deepen your understanding of systemic bias and support you to deliver more inclusive and equitable services.

With this tailored support package, you'll not only deliver your project with confidence—you'll also build lasting skills and knowledge to maximise your impact long beyond the grant programme.
